

Dear Secretary,

I would like to express my view about the population policies to the future of Hong Kong.

It is unwise to initiate the input of outer force by government, workforce will be self regulate by company policy and individual corporation. How you know how many inland peoples are already input into our society, which will be erode the original Hong Kong people in job opportunities. i.e. inland graduate who almost 100 % accept them to stay in Hong Kong. It is unwise for this policy as it will waste the 20 years of education cultivation. Many people in HK with higher education will face the unfair competitiveness and eventually they will seek for government subside budget that will sink the HK financial affordability in the next 20 years. However, in case of the inland higher education group will find the Shaunghai will be the better place to work later, they will leave but Hong Kong without care about HK economy . I hope I am not saying discrimination or envy of their capabilities, but I am concern it will damage all youth and endangered 35-50 ages group of peoples. It is eroded in financial and accountancy files. I think it will erode in another fields if it is not be taken care...

Hope you secretary to feel more about our root grass group of peoples. I am just hope Hong Kong will be better place for living.

God blessing

Mr.Tang.
