Fw: Use of Internet Discussion Forums?

Dear All,

The Population Policy Consultation Document gave us some surprises. It showed the urgency of the problem. Citizens in a big city within a country have the option of moving to the less active villages at retirement. With the present set up and political climate, such an option is not attractive to most Hong Kong Citizens.

- (1) For the proper modern technique in discussions, the Government should set up a moderated forum at its website. Discussions can start immediately without waiting for the deadline in Feb, 2014. Through constructive multi-way discussions, much more can be achieved.
- (2) To have proper control, there can be one or more unmoderated forums for anybody to express his opinion. Some of the useful discussions can then be promoted to the moderated forum.
- (3) Note the use of the term 'multi-way' discussions. Many parties can participate in the discussion on the worthwhile topics or suggestions within minutes. This is much better than collecting tons of comments and then tries to organize and deal with them at the end of the consultation period."

Please see replies 9 and 10 at:
