CHAN CHI HO Tony

Comments:
I would like to give my views on population policy as below.

First of all, I object the import of foreign workers to ease the shortage of local workers as it will cause ethnic minority and social problem as the import labour has different culture and language. It will also draw down the salary level of local workers. The import of foreign labour should be adopted in the fields only where there are no such skill and in short term to ease short term shortage.

I suggest the government should encourage the employers to adopt labour saving measures to increase the productivity. In Australia, there are no toll booth to receive cash in the toll way. There are no attendants in gas station. There are no coin in the bus as it will save manpower to handle the coins. As a modern society in HK, we still employ workers to receive tolls in the tunnels and fill up the gas for drivers. I suggest the government should encourage the business to adopt similar measures to ease manpower shortage.

The government should also give tax concession to the business which employ the aged, disability and low salary female employees. This would encourage this group of people to remain or enter in the labour market.

HK is facing the problem of over population. The land is in shortage. We have nowhere to dump our rubbish soon. Traffic is congested. We should put a ceiling on our population growth. I object the government to import immigrant to ease the labour shortage as I have mentioned that it will cause ethnic problem at the end.

Overall, the government should make good use of the existing labour power and enhance their productivity to ease the labour shortage problem.
