Comments:

I object any immigrant coming to Hong Kong.

Government should stop any new immigrant to Hong Kong.

Hong Kong is now having too many people and is not suitable for living.

Ageing is not a problem. Old people would not occupy too much resource. Most of them have saving. They will not use social resource. Also, we don't need too much labour force and we don't need too many taxes.

The technology advance will not need many people.

People will die naturally and population will come to stable.

After population decreases to 4-5million, people will live very happily.

It is illogical to increase population to deal with ageing. If now increasing more people, then in the future need more and more people to solve these people's ageing. It will be in bad cycle. In one day, the bomb will explode.

In fact, ageing is not a problem. This is nature phenomenon for developed countries. People should pursue better living environment, not for human quantity. No countries with high population can have good living standard. See China, India, Africa. The more people, the poor the country.

Now too many people in Hong Kong. People are in great tension. Because of this, there are so many problems, like youngster cannot find a job.

Government should solve the current situation. Not go to solve the future situation. Government should stop population growth, stop new immigrant.

To give a suitable environment to live.
