within so many 雙非 and 單非 coming to hk; us hong kong citizens are truly afraid to give birth as we don't see we are the first priority anymore. The HK government never truly care of us the "true hong kong citizens"; why do the goverment treat us like a second class citizens and never listen to our demands? what are the goverment afraid of? why must listen to those 雙非 and 單非 who don't contribute nothing to the HK society? They are slowly changing HK into a dying city, do you understand how serious this is? HK isn't a place for living no more and the damages have been done if you honestly want HK to have so many " new hongkonese" then please go ahead and let them damage HK, the city our ancestries once worked hard on. Please we HK citizens have enough with those "new hongkongnese"; it is the time for you to take actions before its too late

Secondly, HK is not a city of freedom no more; we are secretly under control by the Chinese goverment; in this case, i do NOT see why is there

一國兩制 while the Chinese goverment is just being an Asian version of Hilter
