It is quite overwhelming when we see the problems of milk formula and school placements are getting worse over the years. As long as the problems are not solved, esp the problems of new arrivals from mainland China, our plan to give birth to the next generation will be hesitated. No matter how much subsidies the government will be given out to new parents... We do not need money, we need environment without unnecessary competition. We have jobs, we are paying tax, and we do not have time to stay overnight in front of schools to fill in application form....

Please develop a policy that truly and effectively help HONG KONG parents!

Thank you.
