Our government shall take the lead following the example of the singapore government raising the government retiring age to 63 + 3, the extra 3 is subject to health and performance, regardless the objection of civil servant. Many organization locally in fact tend to follow the norm set out by our local government Esp for those civil servants who just reach 55 yrs old and served no more than 15 yrs at the time of retirement, they should not enjoy retirement benefit until they reach 60 yrs old - avoid straining the government resources unnecessary as people who are 55 yrs old are still very productive
