1. Many people still very healthy in the age of 65. They have experienced to help the society. Hence, I'd suggest to extend the retirement period of 5 years. In order to support this, cooperations of both public and private sectors are required. For example, insurance company require to extend the years of coverage /age of policy holders in the insurance policy ...etc.
2. Lots of ladies would like to work after their children reach the age of 6 or 7. However, most companies refuse to hire them because they're not working for continuous 2+ years. In order to encourage them to go back to work, government can offer some incentive scheme for private sectors or lead the trend to hire these 'mothers'. For example, can provide award for companies who hire a number of 'mothers' within a year...etc.
3. HK is a small place. The number of immigrants are higher than the accepted limit. If there is a rule that immigrants is not eligible to enrol any application of subsidize, the number of application for coming HK should be lesser. Family gathering should NOT be the reason anymore as it is easy to apply single/multiple visa to come HK now. Besides, the war is finished for a long time. There should not be that much 'young' and 'closed' family in mainland China anymore.
