- 1) should stop single permit from China immediately as no resources in HK could be afforded, especially public housing, public medical service, education etc.
- 2) stop all immigrants from China including those professional and rich as HK has been already very full in respect of population
- 3) set all policies for those permanent HK residents as the highest priority to receiving public services from HK government.  
  
For those living lower than 7 years, they are not allowed to receive any benefits from HK government, i.e. public housing, public medical, public education.
- 4) set the population limit in HK as 3 million only (naturally reduce to this number after many years).
- 5) review all the existing policies immediately:  
not allow people less than 7-year residence : to apply for public housing, comprehensive social security scheme and other welfare scheme, public education, kindergarten, purchase of private housing units, private medical service, etc.

Only those HK residents with 7-year residents can apply the above.
